

Never has there been a better way to secure your machines. Never. The tire bonnet wraps the tire with 4500 lb webbing. Same principle as a car tire bonnet, but now made for you

The Tire Bonnet is adjustable and fits virtually all ATV tires.

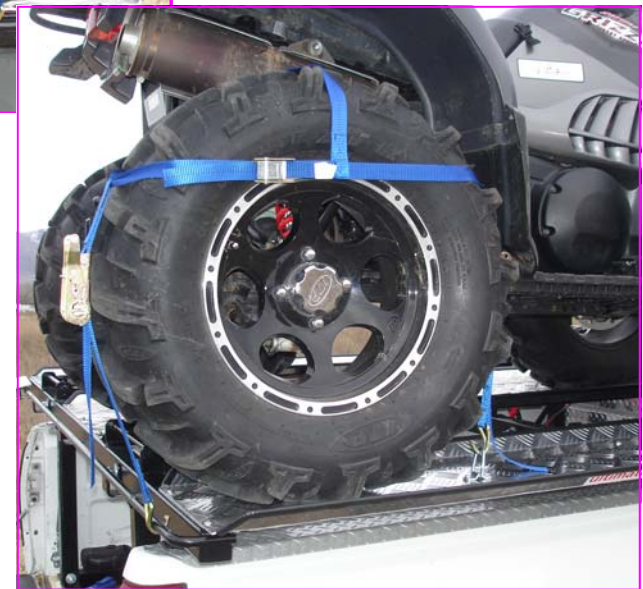

Includes four 1500 lb rated d-ring assemblies. Use these on our racks, a trailer, in the bed of a truck.

Ultimately the best!

**Just \$45.00**

per set of two, plus shipping.

Shipping is **FREE** when ordered with the Ultimate Rack or Side x Side Rack.

*The Ultimate*

# Tire Bonnets

**Four 1500 lb D-rings included. You provide the bolts or screws, then secure the machine to any carrying system.**

**The tire bonnets are made up of one inch wide 4500 lb polyester webbing, two cam buckles and one ratchet . This combination makes the tire bonnet fully adjustable. Simply install over the tire, tighten to fit, and ratchet down for a very secure way to travel. If you have an independent suspension on any of your machines you know what a pain they can be to tie-down. Not any more.**
